OTP Auth Backup Codes

Print and store this in a secure place and do not share it with others!

The QR Codes below can be used to restore the 2-Factor Authentication for the OTP Auth App (App Store Link) The code used to produce this pdf file can be found at https://github.com/kbruegge/otpauth-offline-backup You can use these QR codes to get your OTP accounts back into the OTPAuth app by simply scanning them. This is usefull in case you might need to bring your OTP to a new phone or import them into BitWarden/VaultWarden/1Password and similar applications.

The git commit for the code that created this file is 2b71b602388e4901ec98998e470d87590709a94f.
